

Receiver Appointment Denied; Trial to Continue

Application for appointment of a receiver for Beam Ray, Inc., manufacturing concern distributing a healing ray machine, was denied by Superior Judge Edward J. Kelly yesterday as the first round of a legal battle between present company directors and a former director ended.

Philip Hoyland, former director, had sought the appointment in his suit to force company reorganization. Judge Kelly said present directors received 20 days to answer the suit as amended, and then the case will proceed to trial.
